## Aquavit Key Technology

### Tornado Flushing

### Rimless Bowl

### Slim Inbuilt Jet

## Flushing Test

### 1) 3" flushing valve design

The new design of flushing valve is much bigger than the traditional 2" one which increase the capacity of flushing stream in one go to ensure the superflushing power.

### 2) 360 degree siphon-jet design

The updated design of flushing holes position and flushing angle which help to clean the toilet more effectively.

### 3) Optimize pipe glazing technology

The optimize design and the special made of extra large pipe with the pipe glazing technology help to protect the dust to stick on surface of toilet and the more siphonic effect.

### 4) The super siphon-jet design

The optimize of the siphon-jet design help the water to be arrange equally, the way of natural design will confirm and help the flushing effect.
